ID

AT 11:00 am I was doing circuits in my Super Cub at CYXY.

I landed, cleared and taxied to the refuelling facility where I re-fueled.

There were NO other aircraft on the ramps or taxiways anywhere as I refuelled.  
Once done I restarted and called "Ground" on 121.9

I received clearance to taxi from the refuel facility to taxiway Golf via Echo across Runway 01.

I began to taxi South directly towards taxiway "Echo".

There were still NO aircraft or vehicles anywhere along the route.

Approximately 1/2 way to "Echo" a white Airport truck suddenly came from my right side, crossed in front of me, turned around, crossed in front again and stopped slightly to my right.

The driver appeared to be about 50 years of age with beard and sun glasses.

I asked the Tower what to do. They informed me;  
-"...you have the legal right to be there", and  
-"...they are not supposed to play Chicken with the airplanes like that."

The truck then moved back towards the Terminal and I continued on my way to taxiway Golf.  
The truck made no radio call to me or the tower.

I believe this truck was trying to force me to change direction. He passed within approximately 50 feet of me.

At that time of day I am taxiing directly into the sun, and in a Super Cub with 30" tundra tires.  
Had I not been paying attention I could have easily have hit him. At no time were there any other aircraft or vehicles in front of the terminal or on the ramps or taxi-ways.

Sincerely  
J George Balmer
