

YUKON AVIATION ROLL OF APPRECIATION

This is our list of some of the pilots and ground-support people who we feel deserve to be recognized for their significant contribution to aviation here in the Yukon.

We feel these people distinguished themselves by their many years of commitment to aviation, often doing whatever needed to be done in order to get the job done, despite adversity, isolation, or just in the unique conditions of 'times past'. By doing so they contributed to the Yukon, to the people, to our communities, and to the success of our activities. Some are still flying, some we may never see the likes of again.

We offer our sincere thanks to these people, and many others, whether listed here or not, (in alphabetical order);

Bob Ambrose -	Norcrown Air, and others
