

Reply from Katrina Wohlfarth:

Yep, that's the standard for airside vehicles.

It sure is amazing how much we got this year!

Please find the attached for signature. I based the information on what we have on file – if you could please review the contact information and if anything has changed, please let me know.

Thank you for your time on this,
Katrina

Yeah, we keep track of who is using the snow dump via the licences.
Was the first time this winter on December 23rd?

OK, if it is free, and you really need it?

I took photos while doing it on Dec 23, 2020, and took photos doing it
again on Jan 21, 2021 in case anyone complained. The last time I did it
I took no photos, but that was about two weeks ago?

George

Hi George,

Nope, there is no fee for the licence. It would be good to get that licence
in place. Do you remember when you transferred the snow for the first
time this winter? I can get that paperwork going for you.

Thanks,
Katrina

Katrina, is there a fee for this licence? Unfortunately I missed that point before and I have already moved snow to this site several times using my skidoo trailer. I won't do it again, sorry.

George

Good afternoon,

In November, a note was sent reminding tenants of their snow management responsibilities. There have been some infractions noted prompting this reminder.

Lease agreements state all tenants are responsible for the removal of snow from their leased premises on both groundside or airside. The snow is usually required to be removed to a location outside of the ENWIA footprint; however, the temporary on-site snow dump can be used for the remainder of this winter. Please see attached map for location details (the access is across from the weigh scales). All tenants, whether they choose to participate in the temporary snow

Reply from Katrina Wohlfarth:

dump program or not, remain responsible for maintaining their leased lots throughout the winter season.

As we do our best to remove all of the snow in our areas, here are a few reminders for your space:

1. Snow cannot be pushed or stockpiled within 3 meters of the security fence on groundside and within 1 meter on airside.
2. Snow shall not be piled outside of the tenant's leased premises.
3. Snow must be dumped off-site or in the temporary snow dump area under a licence.
4. Snow must not be stored in a way that would cause future accumulations to impede the movement of aircraft or other airport operations.
5. Snow must also not be stored in a way that would cause future drainage issues for neighbours or airport areas during snow melt.
6. The Airport Manager may direct a tenant, at the tenant's cost, to relocate or remove snow accumulations/piles on the tenant's parcel if they pose a hazard to aircraft operations or violate approved operating standards.

In order to use the temporary snow dump, you will need to contact me at Katrina.Wohlfarth@gov.yk.ca or 867-332-7488 to get a licence.

Thank you for your cooperation,
Katrina
